

Please note:

eClinicalWorks Practices that do not receive automatic compendium updates from the eHub should update their compendiums

You may use a different order\_description but you must use the exact Order\_code for the lab code, and the exact Result\_Code for

If the order code values are not exact, your eCW system will not order or result properly

For questions or assistance with this compendium in your EMR please call the Circle Health Helpdesk at 978-9376445
